

Our Cladding is a low maintenance, environmentally friendly 2nd generation composite board. The manufactured board has a natural looking multi-tone finish. Boards are engineered to eliminate any of the drawbacks of timber so guaranteed against colour fade, rotting, warping, splitting and splintering. Boards do not absorb water like timber so will not harbour mould and become green. Maintenance is minimal and an annual light clean is all that is required to keep in the best condition for the warranted period.

MEASUREMENTS & ACCESSORIES

Our cladding boards are 220mm(W) x 29mm(D)X2900mm(L), solid tongue and groove profile with standard stock lengths at 2.9m. The cladding is fixed with clips, which are hidden fastenings, so there are no unsightly screws in the decking surface.

Sample is 220mm(W) x 29mm(D) x 50mm(L).

Trim is 60mmx60mmx2900mm

COMPOSITION

Our composites are manufactured from 55% sustainable wood fibres and 45% Recycled HDPE (high density polyethylene; typically attained from recycled plastic milk bottles) with a 90% HDPE and 10% woodfibre cap for extra endurance; producing a product with all the workable qualities of wood whilst gaining the durability of synthetic materials that requires far less maintenance and holds a much longer life span than timber.

DELIVERY

We aim to fulfil all orders within 5 working days of order. Delivery cost is free within UK mainland. For Highlands, Islands and Northern Ireland, please contact us through eBay message for an quote. Minimum order quantity is 5pcs.
